

Environmental Policy

THM Corporation engages in environmental issues through hotel management and contributes to protecting the global environment on the basis of the Tokyu Group Philosophy and the Tokyu Group's environmental management policy.

(1) Contribution to mitigating climate change

We promote optimal energy use and reductions to greenhouse gas emissions through promoting energy savings and utilizing renewable energy.

(2) Contribution to a recycling-based society

We work to effectively use resources in the hotel business to promote reuse and recycling.

(3) Contribution to a society in harmony with nature

We consider the impact of the hotel business on the natural environment, reduce pollutants and promote biodiversity conservation.

(4) Compliance with environmental laws and regulations, etc.

We comply with environmental-related laws and regulations and requirements deemed necessary in response to changes in society.

(5) Setting of targets and continual improvement

We set environmental targets and continually make improvements through regular reviews.
